

UPVC – Stable Doors

Offering fully opened, partially open and fully closed 'settings' this classic door style has moved out of the shires and into the avenues. Ventilation, loads of light (or no light at all), childproof barrier, visual barrier to visitors, even something to lean on when you're passing the time of day – not only does the door look fantastic, it offers complete flexibility too.

And when you leave the property, or retire to bed, the multi-point locking system guarantees complete security.
