

Timber Windows and Doors

The Paxtons Timber Windows range of timber windows and doors include specialist ironmongery supplied by UK producer Coastal Group.

Paxtons Timber Windows

PAXTONS was founded in 1992 by Gary and Andrew Bower, and over three decades has earned a reputation for craftsmanship, reliability and personal service. Building on extensive experience in UPVC, aluminium and specialist glazing, the company launched a comprehensive range of timber windows and doors in 2010. Each piece is made to order, combining traditional joinery with modern performance features such as high-security locking, advanced insulation and durable factory finishes. Using only sustainably sourced timber, Paxtons delivers products that blend beauty, strength and long-term value – reflecting the family values and commitment to quality that have guided the business since its beginning.

IMPORTANT

Lipped casement with no dummy sash on left.

Lipped Casement Windows

Our timber lipped casement windows combine timeless style with the comfort and reliability of modern construction. Designed to enhance both older and contemporary homes, they provide a beautifully crafted solution for homeowners seeking long-lasting quality and a naturally elegant appearance.

Timeless style with modern benefits

Timber lipped casement windows offer a familiar, dependable design that remains popular across a wide range of property styles. At Paxtons Timber Windows, we craft lipped casement windows that combine traditional joinery with the reliable performance expected in modern homes. With their characteristic "lipped" profile, they bring a subtle depth to the façade while retaining the warmth and natural beauty of timber.

Designed for characterful and contemporary homes

Lipped casement windows are valued for their adaptability. In older homes, they sit comfortably alongside existing architectural details, providing an authentic look that supports the original character of the property. In modern settings, the clean lines and gently defined profile create a well-balanced, contemporary appearance. Options such as glazing bars, mid-rails, colour finishes and bespoke sizing allow each window to be tailored to suit the proportions and style of the home, whether traditional or newly built.

Comfortable living and year-round protection

Performance is central to the design of our timber lipped casement windows. High-quality glazing, precise engineering and effective weather seals work together to provide excellent insulation and dependable weather protection. These features help maintain a warm, comfortable home throughout the year, offering energy-efficient performance that suits everything from heritage refurbishments to new-build projects. Built for the British climate, they deliver both practicality and long-term reliability. ►

Installed into a substantial country home, this bay window includes lipped casement windows in white with Georgian bar.

Lipped casement bay window with Georgian bar in white produced to match the existing windows in this country home.

Barn conversion including glazed lipped window panel above stained timber entrance door with glazed sidelights in black.

LIPPED CASEMENT WINDOWS

Secure, reliable and suitable for sensitive locations

Every Paxtons lipped casement window is manufactured with security in mind. Multi-point locking systems, strong hinges and secure glazing options offer reassurance and meet modern expectations for home safety. Child safety restrictors can be added discreetly where required. For conservation areas or properties with architectural significance, we offer traditional profiles and detailing that respect original designs while still providing modern comfort and performance.

Crafted with care and tailored for your home

The appeal of timber lies in its versatility and natural warmth. Each of our lipped casement windows is made to order, with a choice of timber species, factory-applied paint and stain finishes, glazing patterns and hardware styles. This level of customisation allows homeowners to create windows that complement the character of the property and reflect personal design preferences, whether aiming for a simple modern look or a classic cottage style.

Sustainable materials and long-lasting quality

Made from FSC-certified timber, our lipped casement windows are designed with longevity and sustainability in mind. Durable protective treatments resist weathering, warping and decay, while straightforward maintenance keeps the windows looking their best for decades. By combining quality craftsmanship with responsible material sourcing, Paxtons Timber Windows provide a lipped casement window range that delivers lasting value and supports environmentally conscious building.

Balanced – two openers and central dummy sash.

Flush Casement Windows

Defined by their crisp, flush profile and carefully crafted detailing, our timber flush casement windows deliver a sophisticated balance of traditional craftsmanship and contemporary design.

They offer a timeless aesthetic that enhances the character and quality of any property.

Refined simplicity for every home

Timber flush casement windows are admired for their understated elegance and beautifully clean lines. At Paxtons Timber Windows, we craft flush casements that unite traditional joinery with modern performance, creating windows that enhance both period properties and contemporary homes. Designed with precision and built from high-quality timber, they offer a subtle, refined aesthetic that complements a wide variety of architectural styles.

Designed for characterful and modern settings

The appeal of flush casements lies in their simplicity. With the sash sitting neatly within the frame, they create a smooth, streamlined appearance that works equally well in heritage cottages and modern architecture. On contemporary projects, their minimalist form pairs naturally with timber cladding, brickwork or rendered surfaces. In older homes – including listed buildings and conservation areas – they provide the authenticity and sensitive detailing that planners often require. With bespoke dimensions, glazing options and finish choices, each window can be tailored to match existing designs or contribute to a new, cohesive look.

Engineered for comfort and protection

Beyond their attractive appearance, our flush casement windows are built to deliver reliable year-round performance. High-quality glazing, precise manufacturing and effective weather seals ensure excellent insulation and resistance to the elements. These features contribute to a warm and comfortable home, helping to reduce heat loss and maintain energy efficiency. Whether used in renovations, replacements or new-builds, they offer dependable protection suited to the demands of the UK climate. ►

External and internal (below) photographs show the installation of flush casement windows between the beams of this barn conversion.

The selection and design of timber windows can add greatly to a project. This block of four flush casement windows in black fit seamlessly into this barn conversion.

The designer of this new build property softened the overall appearance with the inclusion of a 20mm mid-rail to create a cottage style.

FLUSH CASEMENT WINDOWS

Secure, reliable and suitable for sensitive projects

Every window is designed with security in mind. Multi-point locking mechanisms, strong hinges and secure glazing options provide confidence and meet today's standards for home safety. Additional features, such as child safety restrictors, can be included if required. For projects involving listed buildings or conservation areas, we offer authentic profiles and detailing that respect original architecture while ensuring strong, modern performance. This balance makes our flush casements an excellent choice for sensitive refurbishments and heritage work.

Tailored craftsmanship and lasting quality

The natural beauty of timber is central to the character of our flush casement windows. Each one is made to order, with a choice of timber species, factory-applied finishes, glazing designs and hardware options. Whether the project calls for a traditional cottage appearance or a crisp, contemporary finish, we can create a window that complements the style of the property. All windows are crafted from sustainably sourced timber and finished with durable protective treatments, providing long-lasting performance and requiring only straightforward maintenance.

A trusted choice for heritage and conservation projects

Flush casement windows have long been associated with historic buildings, thanks to their discreet design and the way they sit naturally within traditional façades. Our bespoke manufacturing approach allows us to replicate original designs where possible, ensuring seamless integration with existing architecture. With the ability to combine authentic external detailing with modern levels of comfort, security and energy efficiency, Paxtons Timber Windows offer a sympathetic and reliable solution for homes with architectural or historical significance.

The first floor has a sash window in the center. The roof is dark grey with a white gutter. A black planter box is visible at the base of the house. To the right, a red brick wall and a red circular 'no entry' sign are partially visible.

Sash Windows

Timber sash windows offer a timeless vertical sliding design that brings elegance and character to any home. Crafted from high-quality timber and built with precision, they provide a refined balance between traditional style and modern performance.

Box sash – classic vertical sash windows comprising box sash construction with Georgian bar detail.

Box sash – stylish box sash window with single vertical bar in white installed into city centre terraced home.

Box sash – classic six over six glass pane design.

Box sash – design includes 18mm vertical bar.

Spring sash – design includes frosted privacy glass.

Sash Windows

Defined by their graceful proportions and smooth sliding action, our timber sash windows offer a sophisticated blend of period detailing and contemporary engineering. They enhance both historic buildings and modern homes with enduring elegance.

Classic design with lasting appeal

Timber sash windows are one of the most recognisable features of British architecture, offering a blend of traditional elegance and practical everyday use. At Paxtons Timber Windows, we craft sash windows that respect the character of historic designs while incorporating the reliable performance expected in modern homes. Whether chosen for a period property or a contemporary build, our sash windows bring a sense of refinement and enduring quality.

frames and larger areas of glass, making it well suited to replacements or new-build homes where maximising light is a priority. Both styles are built with precision, ensuring smooth operation and dependable long-term performance.

Comfortable living through natural ventilation

One of the unique benefits of sash windows is their ability to provide effective, controlled ventilation. By opening the top and bottom sashes slightly, fresh air enters the room while warm air escapes, helping regulate indoor temperatures naturally. This subtle yet efficient airflow offers everyday comfort while retaining the unmistakable charm of vertical sliding windows.

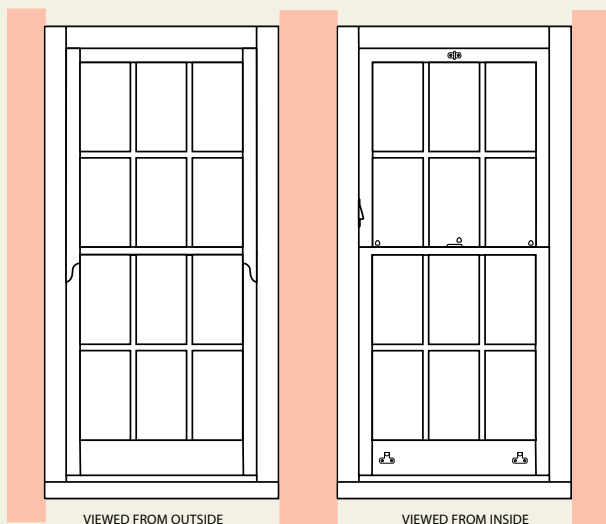

Traditional and modern sliding styles

We offer two main styles of sash window (see illustration below), each designed to suit different property types and project requirements. The box sash, with its concealed weights and pulleys, is the classic choice for heritage homes and listed buildings, faithfully reflecting traditional joinery. Our spring sash design uses a discreet modern mechanism that allows for slimmer

Elegance through detail and craftsmanship

The spring sash frame is slimmer than the box sash and sits within the window opening, when viewed from the front, maximising the glass area when viewed from the outside.

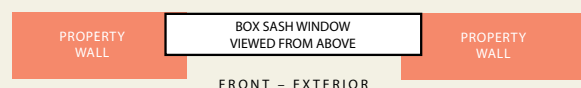

Box Vertical Sash Windows

Position of installed Box Sash Window

The traditional box sash frame sits behind the window opening, when viewed from the front, reducing the overall width of the frame and maximising the glass area when viewed from outside..

SASH WINDOWS

Box sash – classic box sash window design with Georgian bar in white was specified to match the original windows.

range of factory-applied paints, stains and hardware, allows each window to be tailored to the home's architectural style. The warmth and character of timber enhances both traditional façades and more modern interiors, providing a distinctive feature that contributes to overall design of the property.

Safe, secure and built for modern living

Our sash windows are designed to meet today's expectations for security and performance. Strong catches and fasteners provide reliable protection without detracting from the window's period character. Optional safety restrictors can be fitted discreetly for family homes, while integrated draught-proofing and energy-

efficient glazing ensure comfort throughout the year. The result is a window that blends heritage styling with contemporary standards.

Made to last with sustainable materials

Crafted from FSC-certified, sustainably sourced timber, our sash windows are built for longevity. Durable finishes and protective treatments provide resistance to the elements, while straightforward maintenance keeps them looking their best for decades. Combining traditional craftsmanship with responsible material choices, Paxtons Timber Windows offer a sash window range that is both durable and environmentally considerate.

Arkesden-Three timber part-glazed door design with full-depth glazed sidelight in Jet Black (RAL 9005). The design features etched-style glass detail and home number.

Entrance Doors

Combining fine craftsmanship with refined design, our timber entrance doors offer a distinctive and lasting first impression that balances aesthetic appeal with modern security and performance.

Crafted to enhance and protect

A timber entrance door creates the first impression of a home, and at Paxtons Timber Windows we design doors that combine strength, style and long-lasting performance. Each one is made to order, using high-quality timber and carefully considered detailing to deliver an entrance that feels welcoming, secure and tailored to the architecture of the property. Whether traditional or contemporary in appearance, our doors provide a distinctive feature that elevates the character of any home.

Designed for every style of home

Our entrance doors can be created in a wide range of styles, from classic designs suited to period properties to sleek contemporary options for modern homes. Doors can be complemented with sidelights or toplights, either glazed or solid, to bring in natural light or offer additional privacy. Frosted, patterned or decorative glass can also be incorporated to enhance the design. This breadth of choice ensures that each entrance can be designed not only for practical needs but also to complement the proportions and overall look of the building.

Decorative glass and custom features

Glazing plays an important role in both the appearance and function of an entrance door. We offer clear, frosted, patterned, leaded and etched glass options to create the right balance of light and privacy. These choices allow homeowners to personalise their entrance while maintaining safety and security. All glazing is selected for durability, thermal performance and visual clarity, ensuring a door that looks beautiful and performs reliably.

Finishing touches and hardware

Every detail contributes to the quality of a Paxtons timber entrance door. Our collection of handles, knockers, hinges and ►

ENTRANCE DOORS

letterplates allows the final look to be tailored to the style of your home. From polished chrome and brushed steel to classic brass and contemporary minimalist designs, the right hardware adds refinement and helps complete the overall door design. These finishing touches bring individuality to each door while ensuring smooth and dependable operation.

Built for security and year-round performance

Security and performance are central to the design of all our timber entrance doors. Multi-point locking systems, strong hinges and high-performance glazing provide reassurance and meet modern requirements for safety. Weather seals and insulated construction offer robust defence against the elements, helping your home stay warm and efficient throughout the year. Every door is designed to deliver the level of protection expected from a premium entrance door.

Longevity through sustainable craftsmanship

Crafted from FSC-certified, sustainably sourced timber, our entrance doors are made to withstand decades of use. Durable finishes protect against weathering, warping and decay, while straightforward maintenance keeps them looking and performing at their best. With a focus on responsible materials and quality craftsmanship, Paxtons timber entrance doors support long-term sustainability as well as lasting aesthetic appeal.

Paxtons Timber Entrance Door Designs

All Paxtons Timber Entrance Doors can be specified in any colour or a wide range of stain finishes.

Modern (Frameless)

Door furniture

All Paxtons Timber Entrance Doors can be specified with door furniture supplied by our manufacturing partner, Coastal Group, a UK manufacturer based in Cornwall. Their range of door furniture complements our timber ranges perfectly, offering traditional style when required or innovative modern designs for our frameless timber door ranges. For more details visit our showroom where our experienced team can explain the options.

Bespoke Timber

Paxtons Timber Windows can produce bespoke windows and doors to match an existing style or architect's or designer's design.

Bespoke timber window with 20mm horizontal bars produced in white to match the original window it replaced.

Bespoke Timber

Our experienced surveyors and designers can work with you, your interior designer, or your architect to produce the perfect bespoke timber windows and doors for your home or project. With over thirty-five years in the home improvement market – fifteen of them alongside our timber supplier – our design and manufacturing expertise is second to none. And remember, we love a challenge!

Fixed Windows (Non-Opening)

Fixed, non-opening timber windows are often specified for safety reasons or to maximise natural light in the home. At Paxtons Timber Windows, fixed units can be designed and manufactured to match the rest of the windows in your replacement, restoration, or new-build project, ensuring visual harmony throughout.

Recessed Casement Windows

Our designers can work with you or your architect to recreate this traditional timber window style, where the window sash is set back within the outer frame. The design creates depth and strong shadow lines and is popular in Arts and Crafts and Art Deco homes from the early to mid-20th century.

Entrance Doors

From beautifully detailed French doors opening onto a sunny courtyard, to full-width bi-folding doors that slide back for unrestricted garden access, our designers can create the perfect feature for your home. Our bespoke service also includes sliding doors and pivot doors, ensuring we can meet the most ambitious design requirements.

Bespoke One-Off Joinery, Windows and Doors

Timber is the perfect material for bespoke, one-off joinery items that require precision and character. Whether you are working on a replacement, refurbishment or restoration project, our design team can produce exactly what you need – liaising with the Planning Office when required.

- Round windows
- Shaped windows
- Oversized and undersized doors and windows
- Replacement timber features

The Paxtons Timber Windows range of timber windows and doors include specialist ironmongery supplied by UK producer Coastal Group.

Premium Quality Construction and Finishes

Beautifully engineered and made from responsibly sourced timber, our timber windows and doors offer a refined balance of traditional aesthetics and modern functionality. Their distinctive profile and carefully considered detailing make them an ideal choice for adding character and performance to any home.

Timber

All the timber used in the construction of our windows and doors comes from sustainable sources. We review our supply chain often to ensure that the highest standards are maintained.

Construction

Our high-tech manufacturing facility combines the advantages of the latest CAD design, equipment and processes, while maintaining the craft and detail which make our products special.

Finishes

Modern paint and stain technologies provide long-lasting protection that requires only straightforward maintenance. Our wide choice allows you to achieve the perfect look for your home.

Ironmongery

Designed for both style and strength, our carefully selected ironmongery range complements your chosen look while delivering the security to keep your home and family safe.

The Paxtons Timber Windows range of timber windows and doors include specialist ironmongery supplied by UK producer Coastal Group.

The Paxtons Timber 'Style'

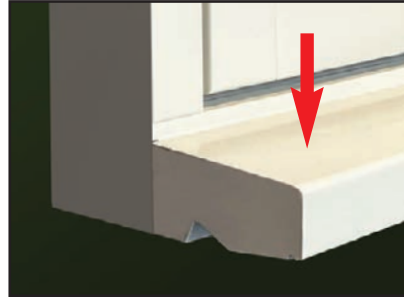

Paxtons has been supplying premium quality timber sash windows for over 35 years and has developed a 'Paxtons Style' for all windows supplied by the company.

The design features take their influence from sash windows produced in the past, combined with our own design touches refined over many years.

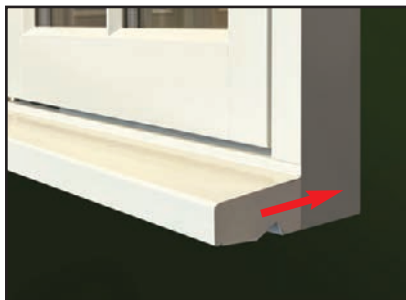

Deeper Lower Section of Sash

One of the design features that makes a timber window distinctive is the inclusion of a deeper lower section of the window sash. This is only possible with timber.

Deep Cill

The use of timber makes bespoke detailing possible, including our standard deep cills which add to the premium look of the Paxtons Timber Windows range.

Front Mounted Cill

Our front mounted cill, as opposed to positioning the window on top of the cill, creates a cleaner look with the gap between cill and sash in balance with the overall design.

Extended Frame

The lower section of the frame is extended to allow the deep cill to be mounted on the front of the frame, creating a balanced appearance when viewed from inside.

Trickle Vents

The trickle vent is a recent requirement in window design, and the challenge has always been to sympathetically integrate the feature while ensuring an efficient air flow, when open. Our standard trickle vents are located under a narrow timber panel on the outside of the frame and cannot be seen. The simple open/closed vent on the inside is located in the top section of the frame.

A Complete Service

Paxtons is a family owned and run company that understands the importance of good customer service. Our hard-earned reputation for quality, service and value is something we are very proud of and work hard to maintain.

Advice and quotation

At Paxtons we employ consultants with many years experience in home improvements so you'll benefit from the best advice and choice of products. And our comprehensive quotations provide full product descriptions, clear pricing and ordering instructions.

Survey and supply

On acceptance of the quotation, our surveyor will visit your home to confirm dimensions, run through the scope of the improvement and assess access and services for our installation teams. When everything is agreed, we will start the manufacturing process.

Expert installation

Every home improvement ordered from Paxtons is overseen by one of our project managers and is installed by our own FENSA approved installation teams. And the final installation is covered by our Independent Network insurance-backed guarantees.

Customer Guarantee and Customer protections

Paxtons was established in 1992 and is still run by the same family. The company enjoys an excellent reputation both locally and throughout the home improvement industry. As members of FENSA and the Independent Network, all home improvement installations are covered by a deposit and stage payment protection scheme and insurance-backed guarantees.

Independent Network

Paxtons is a member of Independent Network, powered by VEKA, which provides a complete portfolio of consumer protections for our customers.

Guarantees

All home improvements supplied and installed by Paxtons include a Paxtons Guarantee, and are covered by insurance-backed guarantee cover for further peace of mind.

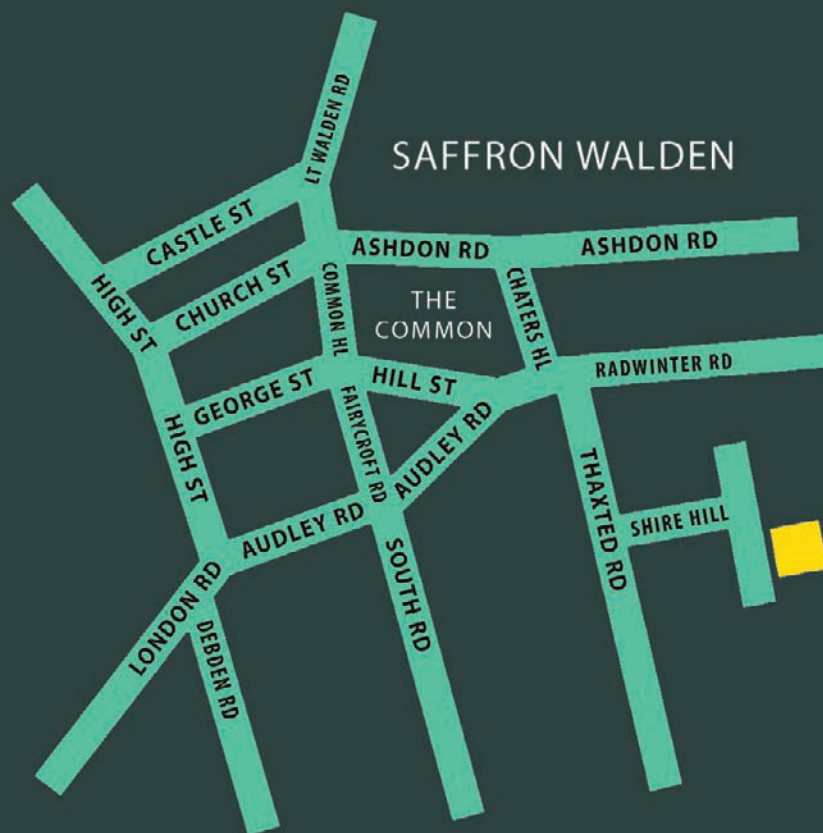

Fensa

FENSA is a government-authorised scheme that monitors building regulation compliance. All Paxtons's installations meet the rigorous standards demanded by the scheme.

The Paxtons Timber Windows range of timber windows and doors include specialist ironmongery supplied by UK producer Coastal Group.
